

POULTRY NETTING

Poultry netting helps keep your chicken and poultry in a contained area when they are outdoors. It also offers protection from predators like foxes. The green colour net blends into the background to make it less obtrusive.

Features:

- Heavy duty poly wires for long life
- Heavy duty fibre reinforced posts with a two-pronged metal foot for stability and pushing into the ground
- 3 x 0.20mm stainless steel conductors per horizontal fence line
- A total of 12 horizontal fence lines of which 11 are electrified. The bottom wire is not electrified as it touches the ground
- Metal clip to easily join multiple nets together
- Repair kit and corner post tie downs included

Nemtek energizer minimum requirements:

- For one net use at least a 0.25 joule energizer
- For two nets use at least a 0.50 joule energizer
- For three nets use at least a 0.75 joule energizer
- For four nets use at least a 1.0 joule energizer with APT
- For more than four and up to ten nets use at least a 2.5 joule energizer with APT

Specifications:

Material	UV stabilised poly wires
Construction	Stainless steel conductors
Lengths	50m
Height	1.12m
